Instructions for the Worksite Mentor(s) and Instructor(s)

The Skill Standards Checklist is a list of the competencies (tasks) to be achieved through mentoring and training at the worksite.

- The worksite mentor should rate each competency as the student acquires and demonstrates the skill according to the performance standards criteria.
- A competency may be revisited and the score raised as the student becomes more proficient at the worksite.
- The mentor and student should go over this checklist together on a regular basis to record progress and plan future steps to complete the required competencies.

I certify that this student has successfully completed the competencies required in my department. Circle your YA role, sign and print your name, and complete with the date signed and the department name.

Operational Program Notes for Skill Standards Checklist

1. Health Science Youth Apprenticeship Curriculum

- Definitions:
 - o Competency- The worksite skill to be performed.
 - o Performance Standards- HOW to assess skill performance as applicable to worksite.
 - Learning Objectives- Content knowledge recommended to learn these skills; may be taught by the employer, school district, and/or technical college.
 - Skill Standards Checklist- The documented list of competencies completed by the YA student.
 - W/S- Listed after a skill indicates that skill performance may be learned and assessed at the worksite
 OR in the classroom in a simulated setting. However, a simulated setting should ONLY be used IF
 there is no possibility of skill performance at the worksite.
- Performance Standards & Learning Objectives are located in the applicable Appendices of the Program Guide for this Youth Apprenticeship.

2. ALL Youth Apprentices MUST complete the Required Skills (Core Skills and Safety & Security) competencies for EACH Pathway they are enrolled in.

- The Required Skills competencies may be completed concurrently with the Technical Skills competencies.
- The Required Skills are common skills specific to all Health Science industry sub-sectors. These skills are aligned with the National Association of State Directors of Career & Technical Education (NASDCTEc) standards for Health Science and the Wisconsin Nurse Aide Candidate Handbook.

3. Youth Apprenticeship choices (depending on job placement)

- Worksites can be chosen from any number of health, clinical, or ambulatory care settings which can train the required skills.
- "Client" is used to refer to customers, residents, patients, and/or persons seeking services.
- Competencies have been reviewed by the Department of Workforce Development for Child Labor Laws.
 Contact the Department of Workforce Development's Equal Rights Division/Labor Standards Bureau at 608-266-6860 for questions regarding child labor laws. SEE Appendix A for special Child Labor Law considerations in this YA Program.
- Students will complete a Minimum Rating in the Required Skills and one pathway unit for a Level ONE Health
 Science YA and a Minimum Rating in the Required Skills and two pathway units for a Level TWO Health
 Science YA.
- The Nursing Assistant Unit may be completed two times for a Level TWO program IF additional competencies are mastered. The Ambulatory/Support Services Unit may be completed two times for a Level TWO program as long as the student is placed in a different service area.
- The Department of Workforce Development Occupational Certificate will indicate "Health Science" attained when the program is completed.

4. Competency Ratings

- Rate the student on the competencies regularly and revisit the competencies with the student periodically to offer the opportunity for an improved rating.
- Arrangements must be made to ensure that the student learns, practices, AND performs each competency even if that competency is not part of their regular job function.
- "Entry Level" criteria should be interpreted to mean "able to do the task satisfactorily."
- "Assist" in front of a skill indicates that the student should perform the skill as indicated in the curriculum "while
 assisting a worksite professional." Training should go beyond "observation only" for these skills. It will be up
 to the employer to determine the criticality of each specific task, training completed, and the actual level of
 supervision required. See curriculum details for requirements.
