Enclosed you will find a worksheet showing our computation of the Social Security Offset.

The total of the Monthly Benefit Amount (MBA) plus the Worker's Compensation benefit rate after the Social Security Offset cannot be less than the Worker's Compensation rate before offset. In this case, the Worker's Compensation rate is greater than 80 percent of the Average Current Earnings (ACE) so the rate should be used to compute the offset.

Please inform us whether you agree with our computation.
